

DYNAMIC REAL-TIME FORECASTING WITH EXCEL

COURSE INTRODUCTION

Sales forecasting is an essential process for managing a business of any size. Accurately plan for your sales can help you manage your resources such as manpower, operations and cash flow more effectively. But developing an accurate sales forecast has never been easy task. It is not a simple number game which you apply a standard sales growth percentage across the board. You have to make sure that the sales targets are achievable by your salespeople and your sales team is motivated to meet those sales targets.

This calls for a bottom up approach in sales forecasting which allows you to get your sales people involved in the forecasting process and their buy-in on the sales forecast. However, the bottom up approach requires you to consolidate the sales forecast before you can analyze how it s going to impact the organization as a whole. This analysis is usually done through multiple top-down views of the sales forecast such as territory, customer, product, sales person etc. The consolidation process can be quite manual and tedious if you do not know the right Excel formulas and functions. Applying the right formulas and functions to the entire consolidation process can help you maintain a consistent link to the individual salesman forecast and get real time updates as the sales persons' forecast changes, without having to repeatedly copying and pasting the updates to your consolidated file.

COURSE OBJECTIVES

You will learn how to develop an Excel based sales forecast template which can

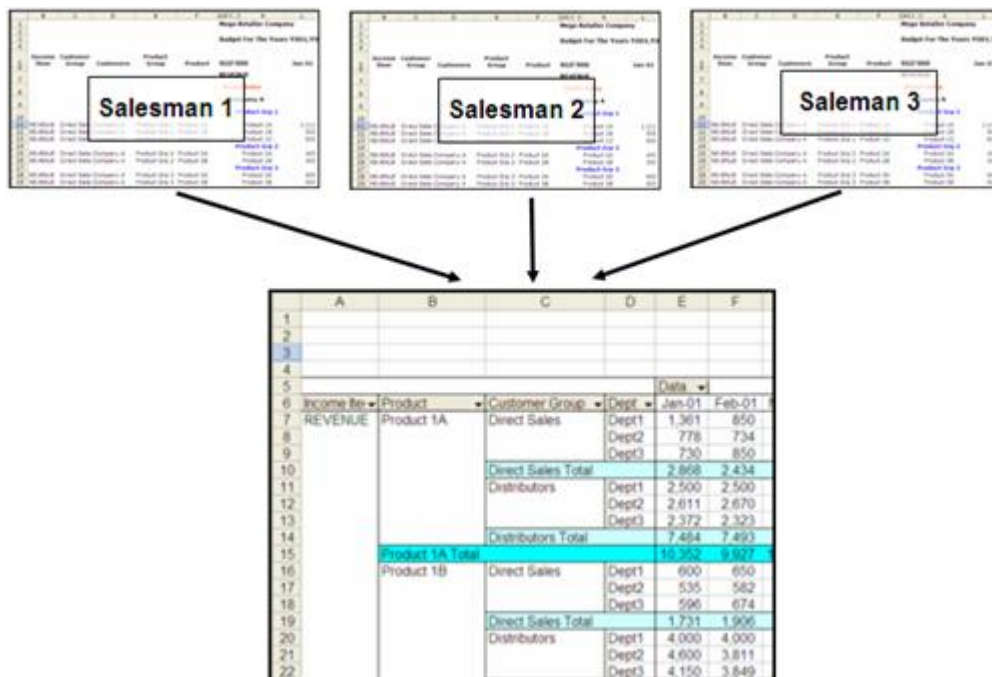

1. accurately consolidate your sales forecast without Inter-workbook links,
2. Provide almost real-time update to sales forecast changes,
3. Provide detailed analysis of your sales forecast by sales person, territory, customers, products, business units, etc
4. Create powerful and professional looking reports and charts that are automatically updated as the sales forecast changes.

COURSE OUTLINE

1. Transforming the sales forecast in the template into a database.

	B	C	D	E	F	GHIJ	K	L
1						Mega Retailer Company		
2						Budget For The Years Y001,Y0		
3								
4								
5	Income	Customer	Customers	Product	Product	SGD'000		Jan-01
6	Item	Group		Group				
7						REVENUE		
8						Direct Sales		
9						Company A		
10						Product Grp 1		
11	REVENUE	Direct Sale: Company A		Product Grp 1	Product 1A	Product 1A		1,111
12	REVENUE	Direct Sale: Company A		Product Grp 1	Product 1B	Product 1B		500
13	REVENUE	Direct Sale: Company A		Product Grp 1	Product 1C	Product 1C		600
14						Product Grp 2		
15	REVENUE	Direct Sale: Company A		Product Grp 2	Product 2A	Product 2A		400
16	REVENUE	Direct Sale: Company A		Product Grp 2	Product 2B	Product 2B		300
17						Product Grp 3		
18	REVENUE	Direct Sale: Company A		Product Grp 3	Product 3A	Product 3A		600
19	REVENUE	Direct Sale: Company A		Product Grp 3	Product 3B	Product 3B		500

2. Consolidate data from multiple workbooks into one file using MSQuery.

3. Multiple top-down views of sales forecast

- Update multiple Pivot Tables from the same source with ONE refresh. No macro is required.
- Prepare reports and presentation that are updated automatically with the latest forecast.

COURSE DURATION

2 days

WHO SHOULD ATTEND

This course is specially tailored for Sales Directors, Chief Financial Officers, finance managers, sales managers and executives in sales planning, business planning, corporate planning, accountants, financial analysts who are involved in sales forecasting.

The participants are expected to know VLOOKUP, IF formula, absolute and relative referencing, and pivot table. Participants are highly encouraged to attend our foundation course "**Hidden Secrets to Excel Data Analysis**" first before attending this course.

CLASS SIZE

The course is conducted with a class of no more than 20 participants.

DETAILS ON THE COURSE

Dates : 31 Mar & 1 Apr 2011
30 May & 31 May 2011
18 & 19 Aug 2011
17 & 18 Nov 2011

Time : 9 am to 5 pm

Venue : 10 Anson Road #26-02A
International Plaza
Singapore 079903

Price : S\$600 Nett

Computers and Course materials will be provided by *everydayExcel*.

OUR TRAINERS

everydayExcel' trainers are all experts in spreadsheets and databases. They are specially hand-picked by our Chief Trainer, Jason Khoo, based on their experiences in training and the business knowledge they possess. Jason has worked in local companies and foreign MNCs supporting the marketers in their analysis of marketing plans and providing quality information for decision making. He was also a financial counsel for a Fortune 500 company's business unit which generated a total revenue of more than S\$100 million per annum.

everydayExcel has helped many companies save thousands of dollars by providing simple and yet powerful business solutions through the use of Microsoft® Excel. Examples of such solutions include budget planning and forecasting, customer segmentation program, personalized email broadcast to targeted customers, and sales lead generation program (mini CRM), etc.
